

**ABSTRACT OF THE DISCLOSURE**

**A METHOD OF TRANSFERRING INFORMATION FROM A PLANT FOR  
THE PRODUCTION OF PACKAGING MATERIAL TO A FILLING  
5 MACHINE, A METHOD OF PROVIDING A PACKAGING MATERIAL  
WITH INFORMATION, AS WELL AS PACKAGING MATERIAL AND USE  
THEREOF**

In the present publication, a method is described of transferring information  
10 from a plant for the production of packaging material to a filling machine,  
comprising the steps of: producing a web of the packaging material, measuring, on  
the production of the web, a predetermined magnitude in a first portion of the web,  
the portion being intended to form a first package in a filling machine, providing, on  
the production of the web, a second portion which is intended to form a second  
15 package in a filling machine, with information as to said measured magnitude,  
reading-off said information in a filling machine and controlling a second  
predetermined magnitude in the filling machine on the basis of said information.
